

July 19, 2018

Dear PRO-Link Customer:

As of July 6, 2018, there was a 25% steel tariff imposed on a long list of imported products. On that list are product groups imported by PRO -Link, Inc. We were hoping that trade policies would only affect raw materials and not finished products, not so. Unfortunately, the tariff is too great for PRO-Link to absorb. Due to time factors, modification for all our product pricing is not possible. Beginning today, a tariff charge line item will be added to your invoice for the foreseeable future. Any written quotes within the last 30 days will be honored. Our hope here is that the tariff will be temporary.

Our belief in running our business over the years has always been to provide a quality product at a fair price to our customers. Because of the uncertainty of this trade dispute, any relief can only come through our government's negotiations. We will be sure to contact you if there are any developments or changes that would affect PRO-Link's valued customers.

We appreciate you and your loyalty to our products and service over the years. If you have any questions, please call 1-855-361-5987.

Regards,

Don Storts, President

PRO-Link, Inc.
